

# Petro Kozak

BLOCKCHAIN & FULL STACK DEVELOPER

## Profile

Starting from middle of 2016 began proactively working on blockchain related projects as a Blockchain software engineer.

I have deep knowledge in blockchain architecture patterns, and different blockchain standards and eco-systems.

I am talented to design secured blockchain architecture based on solid technologies, develop application features and interfaces, and maintain client and server-side applications.

## Experience

### MERIXSTUDIO

APRIL 2013 — MAY 2018

As a full-stack developer, I have worked on full software development cycle from concept through development for multi-platform.

### SPECTRUMTRACKING

JULY 2018 — JUNE 2020

As a full-stack developer, I have worked as back end developer, front end developer, quality assurance tester and CTO as needed.

### ALCHEMIX

SEPTEMBER 2018 — JUNE 2021

As a Blockchain developer, I developed smart contract based on ERC20 protocol for ALCHEMIX coin, farming and stacking functions and developed front-end using React.js.

### PPPANDAS

AUGST 2021 — NOVEMBER 2021 11

As a lead developer, I developed smart contract for pppandas NFT and developed website

## Education

### Kharkiv National University of Radio Electronics.

Bachelor of Engineering - BE | 2008 ~ 2013
