

Teng Min

Full Stack | Blockchain Dev

itdeveloper724@gmail.com

Introduction

Talented senior software engineer with strong experience in dApp development and worked on various projects over the last 8 years.

As a senior full stack and blockchain developer, I am expertized in creating smart contracts and developed many professional Defi, DEX and DAO platforms on EVM based networks, Solana and Cosmos network.

With the big booming of NFT market, I am also deeply engaged in NFT platform development and doing continuous research on top trend blockchain technologies. With the long experience in software development, I have the sufficient qualifications and capabilities to develop project from scratch to release. I am a creative problem solver and like to working with good team members and share new ideas for the progress.
