- ✔ GraphQl
- ✔ MUI
- ✔ React
- ✔ Semantic UI
- ✔ TypeScript

Education

B.Sc. CS | Graduated | Donetsk National University of Technology, 2014

Experience (6 Years)

React frontend & Nest backend developer	March 2022 - July 2022
Inventi	Brno, Czech Rep

https://www.inventi.cz/

I worked as a part-time contract developer in INVENTI. I was a full stack developer in this company for 5 months. Mainly I focused on the UI redesigns in modern styles using React and the Nest backend part for middlewares. The project was a complex ecommerce platform to manage all the products, orders, carts, delivery and etc... in one place.
I retired this company because it was a part time position and my contract was finished on July.

React Frontend Engineer	April 2021 - December 2021
Artio Group	Brno, Czech Rep

I worked as a contract react frontend engineer at Artio Group for 9 months. I worked remotely at home using AWS, Jira, Gitlab and Slack. We had 9 members in our team. And I was one of 3 frontend developers. The project was a big ecommerce plantform which deals with a chemical products in the U.S. I worked for the Frontend part using React.
I retired this company because my task and contract are finished successfully.

Learning English and Blockchain	August 2020 - March 2021
Online Course	Donetsk, Ukraine

I learnt English and Blockchain technology online and finished a small blockchain project. I am a frontend engineer so I just focused on only web3 and ehters in react.

JavaScript Full-stack Engineer	June 2016 - July 2020
Intent Solution Group	Donetsk, Ukraine

https://www.intentsg.com

I worked 4 years at this company. I was a javascript full-stack engineer and I developed several websites. I learnt modern frontend materials like react, redux, tailwind, graphQl and typescript. There is one website which I can proud most in this company below.
https://www.moneyminx.com
I retired this company because of COVID19

Projects

Mailstep	March 2022 - July 2022

Inventi

https://www.mailstep.cz

Tools: Javascript, Typescript, Node.js, Nest.js, React, GraphQl, Socket API, Styled-components, Gitlab, Docker

This project is a complex ecommerce manage platform to manage all the products, orders, carts, delivery, and etc... in one place. Users can use this service in Czech Repulic and Europe countries. I mainly focused on the moder UI redesign parts and sometimes Nest.js backend part for the middleswares.

BluePallet	April 2021 - December 2021

Artio Group

Tools: React, Next.Js, Redux, JavsScript, SemanticUI, MUI, Node.Js, Gitlab, Jira, Slack, AWS

https://www.bluepallet.io/
The Services include a platform where manufacturers and sellers of chemical products ("Sellers") can create listings to sell their products ("Products") and where Users can make purchases of such Products ("Buyers") from such Sellers.
I was one of 3 frontend developers in this project. We had 9 members in this project. I took part in this project for 9 months. I mainly focused on the admin part of this project. I finished companies manage system, produts manage system, alert system and orders system.

Wax NFTs marketplace	November 2020 - February 2021

Tools: React, Next.Js, Redux, TailwindCss, Github, Slack, Blockchain, Ethers, Web3, Binance, NFTs, Wax

https://market.yoshidrops.com
https://waxmarketcap.com

I took part in the development of this project for 4 months and I worked with the frontend part. I just followed the designs provided using react and tailwindcss. I used wax.js and eos.js to communicate with Wax blockchain server.

MoneyMinx	December 2016 - September 2018

Intent Solution Group

Tools: React, Next.Js, Redux, TypeScript, MUI, Node.Js, Github, Jira, Slack, AWS

https://www.moneyminx.com/
MoneyMinx helps you to track all your investments in one place. I worked as a full stack developer (react and node.js). We used typescript. It was difficult to manage all of the investment system but we did it finally as our clients want.
I developed it for more than a year. I mainly focused on the analyzing part in this project. There are many talbes and graphs to show the history and necessary data. I managed those complicated data processing.
